

Ruukki Construction

Environmental Policy

We in Ruukki Construction

- are committed to reduce the CO₂ emissions in our operations
- work ambitiously to produce sustainable products and services for our customers
- consistently develop our skills in cooperation with strong partners to meet all environmental stakeholder requirements
- are proud of our environmental development and future progress

Our customers and building users

- will receive products and services that are safe and valuable also in hands of next generations
- will receive reliable fossil-free product portfolio first in line
- can be comfortable with that environmental risks are controlled in every phase of our products' life cycle

Helsinki 10.8.2021
