Product description

Roof drainage system consisting of gutters and associated components of semi-circular cross section and down-pipes and pipe components of circular cross section. The gutters and down pipes are made of hot-dip galvanized and painted steel sheet, or aluminium-zinc coated steel sheet, both with thickness 0.6 - 0.7 mm. Gutter brackets are made of hot-dip galvanized and painted steel strip with a thickness of 5 mm.

Intended use

Collection and draining of rainwater and melted snow from roofs.

Trade name

Plannja Takavattning or Plannja Siba.

Approval

The products satisfy the requirements set forth in chapter 8, 4 § 3 PBL, in respect to and under conditions stated in this certificate, and are therefore approved in accordance with the provisions of the following sections of Boverket Building Regulations (BBR) issued by the National Board of Housing, Building and Planning.

BBR

Surface water installations

Design

6:642, 1st paragraph

6:644, 1st sentence

Associated documents

“Monteringsanvisning 2017 Takavattning”, version 2017 January.

Control

The factory production control (FPC) is monitored by an independent inspection body.

Control agreement: 210-17-0138, Inspection body: RISE Research Institutes of Sweden.

When the building proprietor performs inspection at the building site, markings shall be checked to ensure that the correct products have been supplied and that they are used in accordance with the conditions in this approval and associated documents. Further the product shall be accompanied by a manufacturer's assurance, certifying that the product has been manufactured in accordance with the documents on which this approval is based.
